

The City of Martensdale will do our annual hydrant flushing from May 11-15, 2026.

WHAT TO EXPECT

When crews are in your area, you may notice a drop in water pressure or discolored water. Discolored water may occur, because the sediment in water mains get stirred up when the fire hydrants are used and when the flow of water in mains is changed. This is normal. If this happens, it is not harmful. Simply let your water run until it is clear.

As always you can contact the water department
at 515-664-1442.
